Dear Sir/Madam,

I heard about (Naziv firme) from an open position post on HelloWorld and after looking at your site I wanted to inform myself about your company first. I also read comments about the company on Joberty.rs. After looking at requests for the role I decided to apply for it.

During my internship at ISUM, I learned a lot of things like how to communicate with my mentor and how to work with a team, I also put my knowledge and ability to learn new things to the test since most of the things I did were things I never did before, also I learned a lot about best practices. Alongside the internship, I also learned a lot while doing my university projects.

My goal is to constantly improve my knowledge and learn something new every day either from my colleagues or from reading documentation. I also like to explore new concepts and solve coding problems in my free time. I think your company can allow me to fulfill all of these requirements.

I would like to get the opportunity to show you my skills and to improve them in your company. No matter what your final decision is, I would like to thank you in advance for looking through my application.

Yours faithfully,
Aleksa Cekić
